Getting the NAP ready for implementation

United Nations Climate Change

Ministry of Green Economy and Environment

NAP Expo 2025
Zambia
Innovations in the NAP Process

Financing and implementation provisions

- Cost estimates of the adaptation priorities, where possible.
- Efforts to expand the funding base beyond grants and loans, including a strategy for expanding the pool of available funding.
- A mapping to different funding sources through:
  - GCF country programme
  - GEF, LDCF, SCCF strategy
  - AF country programme
  - Country engagement plans with international financial institutions
  - Engagement model for philanthropies
  - Innovative finance plans
  - National budget support for the NAP
- Provisions for enhancing complementarity between the activities under the different funding channels in support of implementing the NAP as a national programme.

Existing instruments for adaptation finance

- **Grants:** targeted group or focus area, projects and programmes
- **Loans:** usually for infrastructure projects; delivered as concessional loans or blended finance
- **Equity:** capital in exchange for ownership stakes in projects or companies; private sector engagement, impact investment, or scaling innovations
- **Bonds:** green, social, sustainability, catastrophe, municipal, etc.
- **Guarantees**: offers risk transfer, attract private sector investments, examples: partial risk, performance and credit guarantees
- **Insurance claims:** form insurance facilities; post disaster claims and payouts are made based on the intensity of an event

Determine financing needs for implementation

- ❑ Map adaptation priority actions into project ideas and programmes
- ❑ Integrate NAP priority projects into applicable country programmes/country assistance frameworks for each actor or funding vehicle
- ❑ Develop a 5-year programme for implementing the whole NAP, targeting a variety of relevant funding/financing windows for the projects or combinations of windows.
- ❑ Follow the relevant project or funding cycles to prepare funding requests (in the form of project proposals or other formats as applicable)

Suggested essential projects / actions – based on GGA dimensional targets

- ❑ Readiness support for adaptation planning from the GCF.
- ❑ Multi-hazard early warning systems.
- ❑ Climate information services for risk reduction.
- ❑ Systematic observation to support improved climate-related data, information and services.
- ❑ Formulating the NAP for submission by 2025.
- ❑ Policy instruments and planning processes and strategies by 2030 covering ecosystems, sectors, people and vulnerable communities.
- ❑ Adaptation mainstreaming in all relevant strategies and plans.
- ❑ Design and establishment of a system for monitoring, evaluation and learning.
- ❑ Operationalization of the system for monitoring, evaluation and learning.
- ❑ Building the required institutional capacity to fully implement the system for MEL.
